Thank you for purchasing our Yamaha YXZ1000R Chassis Gusset Kit for your OEM Frame. Below are pictures with locations of the pieces in your kit. Teixeira Tech recommends that the installation of the kit be done by a professional welder for the best results.

Part numbers and quantities:

Part #	Special Instructions
001	Weld 3/4" above a-arm mounting tab
002 & 003	Grind slightly for proper fitment. Position top of tube 1" behind upper rear a-arm mount.
004	Install towards the outside of tubing to allow clearance for body plastics
005	Install above main tube rails for strength
006 & 007	Must install these 2 parts at same time to fit correctly
010 & 011	Weld flush to inside of tubing so as not to interfere with body plastics
